Dear ASOHS Members and Friends,

This book was originally the result of about ten years of research by Les Burch, a former ASOHS board member. The task he started was a monumental one and his research will always be greatly appreciated. The book continues to be a work in progress because new schools open and close each year and, thankfully, new information about our schools is discovered. I am currently enjoying this path of discovery and hope to share more of my research through the Q.

You are encouraged to review the lists and provide any additional information to the ASOHS office or the current historian. I know there are many of you who can provide information about the opening or closing years for schools that we are missing. Please help us accurately complete this list. I will update this book each year with your help and further research.

In addition to the list of overseas schools, a very incomplete list of current and past stateside schools (DDESS) is included. Also there is a list of the current DoDEA schools with demographic information. Thank you to Frank O’Gara for providing this information.
